MAR16 - Folkloric Martinique & Rum Distillery TOUR

CULTURE AND HISTORY

For an authentic taste of Martinique, step off the ship, board a coach and travel through the rainforest to one of the island's best rum distilleries. On the way, a stop will be made at Balata Church, an exact miniature replica of the Basilica of the Sacred Heart in Paris that affords a spectacular view of Fort-de-France and the bay. You will stop at the Volcano museum situated at the foot of the mountain Pelée to understand the eruption history. A visit to the Depaz rum distillery will not only give you a chance to learn a little about the process of making rum, but also let you sample the special rhum agricole, which is distilled only in Martinique and is made using freshly squeezed sugarcane juice rather than the conventional molasses. A 10-minute drive from the distillery will take you St. Pierre, the former cultural capital of Martinique that was tragically destroyed in a major outbreak of Mount Pelée in 1902. The modern-day town of St. Pierre is France's 101st "City of Art and History". After visiting the Ruins of the theatre, your return trip to Fort-de-France will take you through Le Carbet, the spot where Columbus landed in 1502 and the town that inspired Gauguin to paint some of his most beguiling canvases. Also on the itinerary are Bellefontaine and its famous boat-shaped house as well as Schoelcher, a seaside resort that was named after a 19th-century French abolitionist writer. Please note: the tour itinerary may be reversed. As this tour involves travelling along winding roads, it may be unsuitable for guests who are susceptible to motion sickness. Shooting videos and taking photos are not permitted inside the Morne Rouge Volcano Museum.

BRB05 - BEST OF BARBADOS

CITY TOUR

Step aboard your air-conditioned coach for a scenic drive through the rolling hills of the countryside to St. John's Parish Church which is perched on a cliff, 800 feet above sea level, overlooking coastal St. John and the Atlantic Ocean. The church contains an interesting sculpture depicting the Madonna and Child with the infant St. John. The graveyard contains the tomb of Ferdinand Paleologus, a descendent of the Byzantine Imperial family, who died in Barbados in 1678 after being a resident for over 20 years. Continue on to Flower Forest, which sits on 6 acres of land, some 800 feet above sea level in the central parish of St Thomas. A meandering path winds its way between beautiful outcrops of coral, rock gardens, cool shady gullies and ponds. Wonderful photo opportunities abound for the professional and amateur photographer. Your last stop, Sunbury House, dates back to 1650. The house was destroyed by fire in 1995, and was gracefully restored and re-opened in 1996. It possesses one of the country's superior collections of antiques. The cellars, originally used for storing yams and other root vegetables grown on the plantation, now house a unique collection of antique carriages, the largest collection in the Caribbean, as well as many items used in the domestic life of the plantation. Sunbury Plantation House, located in the tranquil St. Philip countryside, is a living monument to plantation life of a bygone era, carefully restored and lovingly cherished by its owners for posterity, for the enjoyment of generations to come.

BRB22 - HARRISON'S CAVE & SCENIC DRIVE

ACTIVE & ADVENTURE

Harrison's Cave is a magnificent natural phenomenon, quite in a class of its own. Formed from a particularly beautiful type of crystallized limestone, this stunning cavern is undoubtedly one of the most spectacular natural attractions in the entire Caribbean. Though created over the course of hundreds of thousands of years, Harrison's Cave has only been accessible to the general public for some 15 years. The first recorded history of Harrison's Cave dates back to 1796, but it then lay undisturbed until it was rediscovered in 1970 by Ole Sorenson and developed by the Government of Barbados. After checking in at the Visitors Center, you will be taken into a theatre where you will watch a short film on the formation of Barbados. Then you will board the electric tram that will take you down into the cave. As the driver pulls away, your guide will commence her commentary and you are on your way to a memorable experience - magnificent chambers, incredible stalactites and stalagmites, bubbling streams, tumbling cascades, plunging waterfalls and emerald pools. Throughout the almost mile long cave the flowstone covered walls glisten in the lights as the calcite laden waters drip down from the roof. At various points the tram stops to allow passengers to disembark and have a closer look at the beauty at hand. Just remember how long it has taken for these precious features to form and please do not touch them! One stop takes place at the lowest point in the cave, where a waterfall plunges into an emerald pool. Flash photography is permitted - not video - so take your camera.

**GRE03 - CREOLE BUS SENSATION**

SCENIC ROUTE

Originally British, the Creole buses were the first large means of transportation on the island in the 50's. Neglected and forgotten over the course of the years due to the competition of modern transport, they are currently making their comeback to provide you with the opportunity of savoring the charm of Grenada in the early days! Nothing has changed: bright colors, and deliciously padded wooden benches. So, off we go for a truly local cocktail. Grenada's capital is very British in nature with the Carenage, an adorable little harbor set in the hollow of an ancient volcano. This is our point of departure from where we launch ourselves in the assault of St George's, following a labyrinth of roads reminiscent of San Francisco, Caribbean style! And on board of the Creole buses, the drive takes a turn for the unexpected! It is indeed a bit of a climb to reach the heights of Grenadian history; we are on our way to the sumptuous panoramas that can be admired from the old forts: Fort George and Fort Frederick. Fort George overlooks the small capital. Its ancient stones and rocks tell the tale of the culture shock between England and France in the old days; as for Fort Frederick, it stands dominant above the tropical rainforest and the Caribbean Sea, offering a panoramic view of 360 degree. Leaving Fort Frederick behind you, you head to the south of the island, "surfing" the hill tops, as the bus follows the road along the tropical hills and slides down the rural delight of the Grenadian countryside. It is only on the beach, with your feet in the water, your head below the sea grape trees and a rum punch in your hand that we propose an end to this Creole escapade! Please note: Maximum weight is 90 kilos. Beach chair available (Usd, 5/chair) but not included in the tour. Guests must be in good health to climb the forts; however they can stay in the bus during the visit.

NATURAL WONDERS

The west coast of Grenada hosts a number of features that are very specific to Grenada: spices and cocoa at Dougaldston Estate, nutmeg in Gouyave and in the tropical heights, waterfalls and plantations! The point of departure is St George's and we follow the road to the North along the Caribbean Sea. Your first stop is Dougaldston Estate. Founded in 1700, this ancient cocoa plantation opens the wonderful palette of spices and scents of the island. In Gouyave however, fishing is not the only source of income and this small town reveals one of its most surprising features: the nutmeg cooperative plant. Well-protected behind high walls, you will travel about one century back in time: no conveyor belts, no machines; the long processing chain of this precious spice starts off in the hands and nimble fingers of the kind-hearted "mamas". Here you enter in the kingdom of women! Humble and conscientious, their movements are founded day after day in the long tradition of secrets of nutmeg, placing these ageless sites second in the world of exporting nations. On your way back, you make a tiny detour to enjoy a swim in the natural lovely pool at the Concord Falls. There you will discover a very particular type of plantation. Here the nutmeg and cocoa trees grow along the flanks of the hills in the tropical forest that is forever near. Please note: it is not permitted to take photographs inside the Nutmeg factory.

Without a doubt, Grenada is one of the most charming islands in the Caribbean. The unspoiled natural beauty is what makes the island so unique. The factory has been in operation since 1937, and is situated in the southern part of the island, in the Parish of St. George's. Needless to say, the views are exceptional. Grand Etang is a crater lake surrounded by a lush tropical forest and is part of the nature reserve. The scenery is breathtaking, with the chance to see a fascinating cross-section of the flora and fauna which make up this rain forest. Then, en route to Fort Frederick, where this historic fort offers a fantastic view of the town and the harbor.
